SPRING 1963 FALL

GERALD D. WALTZ

Grower of Choice Daffodils

P. O. Box 977, Salem, Virginia

ROYAL HORTICULTURAL SOCIETY OF LONDON

CLASSIFICATION of DAFFODILS

- DIVISION 1. Trumpet Narcissi : one flower to the stem, with the trumpet as long as, or longer than the perianth segments (petals).
Examples - King Alfred, Preamble, Cantatrice.
(a) Perianth colored (varying shades of yellow); trumpet colored also, - not paler than the perianth.
(b) Perianth white; trumpet colored (some shade of yellow, usually).
(c) Perianth and trumpet white, - or nearly so.
(d) Any other color combination, - such as the trumpet being lighter in color than the perianth.
- DIVISION 2. Large-cupped Narcissi : one flower to the stem; crown MORE than one-third, to nearly the length of the perianth segments.
Examples - Galway, Green Island, Kilworth.
(a), (b), (c), and (d) as in Div. 1, - except that in (a) the colored crowns may be yellow, or orange, red, etc., and in (b) wholly, or in part, yellow, orange, red, pink, buff, apricot, salmon, etc., etc.
- DIVISION 3. Small-cupped Narcissi : one flower to the stem; cup Less than one-third the length of the perianth segments.
Examples - Mangosteen, Matapan, Chinese White.
(a), (b), and (c) as in Div. 2.
- Division 4. Double Varieties.
- DIVISION 5. Triandrus Narcissi, of Garden origin : usually 3, (sometimes more, or less) white, creamy white, or pale yellow flowers per stem.
Examples - Tresamble, Stoke, Silver Chimes.
(a) Cup, or corona NOT less than two-thirds the length of the perianth segments.
(b) Cup, or corona LESS than $2/3$ the length of the perianth segments.
- DIVISION 6. Cyclamineus Narcissi, of Garden origin : medium sized or smaller flowers, usually with reflexed petals.
Examples - February Gold, Dove Wings, Beryl.
(a), and (b) as in Div. 5.
- DIVISION 7. Jonquilla Narcissi, of Garden origin : usually golden yellow, more or less fragrant, and with 1 to 3 or more florets per stem.
Examples - Hathor, Golden Perfection, Cherie.
(a) and (b) as in Divisions 5 and 6.
- DIVISION 8. Tazetta Narcissi, of Garden origin : mostly Poetaz Hybrids, with 3 to 6 or more, more or less fragrant florets per stem.
Examples - Geranium, Martha Washington, Golden Dawn.
- DIVISION 9. Poeticus Narcissi, of Garden origin : - the Poet's narcissi, snow-white petals, and red-rimmed cups, or eyes.
- DIVISION 10. Species, and wild forms. Example - Jonquilla Single.
- DIVISION 11. Miscellaneous, - those not falling in any other group.

C O N T E N T S

DAFFODILS - pages 7 - 16

A superb selection of outstanding varieties is offered. I expect to harvest a fine crop of bulbs, from which my orders will be filled, - in part. My stocks of many of the newer and higher priced varieties are limited; therefore needed bulbs of these varieties will be purchased from the originator, - or other leading and most reliable growers. I find it impossible to keep up with all the fine new varieties coming out every year, - to grow them, or even to list them. However, I can still supply many of these wonderful varieties, - most of those originated and/or offered by Messrs. Dunlop, Jefferson-Brown Richardson, and Wilson, as well as G. Mitsch, - bulbs of their own growing, in most instances, at their (retail) catalogue prices, net, with no discount, - IF your order is sent in to me EARLY this Spring; (I believe that most A.D.S. members have catalogues from these growers). Thus, most of your wanted varieties from these growers, and others, together with desired Tulips, Hyacinths etc., can be secured all in one order, likely with less Postage cost, and no need for import Permits.

If you are interested in Daffodils in quantity, for Landscape use, or for cutting, a fine Mixture is offered on page . You will also find there an assortment of varieties for Naturalizing.

DUTCH IRIS - page 17

These are about the latest of the Spring-flowering bulbs, coming after the late Tulips. Fine for cutting, or garden and yard decoration. The bulbs somewhat resemble Tulips, but are smaller. They come in varying shades of blue, yellow, and white.

HYACINTHS - page 17

Blooming fairly early in the Season, with the Daffodils and early Tulips, Hyacinths are ideal for planting with them, especially as an edging for beds of these other flowers; and they are very effective in borders or beds by themselves, either all one color, or in contrasting colors. They are also splendid for indoor culture. Offered in a wide range of colors, - white, pale yellow, pink, red, all shades of blue and purple.

TULIPS - pages 18 - 22

An "out of this world" selection of these is offered, highly recommended varieties, in many types, and all colors of the rainbow; a number of fine new Fosterianas are included, and many Hybrid Darwins, some of them the new yellow ones. Many other varieties not herein listed can be supplied (if you wish several dozen of a variety), if you will ask for quoted prices, and send in your order this Spring.

Tulips, as well as Hyacinths and the other smaller bulbs, should be planted in quantity, for mass effect, - preferably several dozen or more of a variety. The Fosterianas, Single and Double Earlies, Mendels, and Hybrid Darwins as a rule bloom at about the same time as the Daffodils, while the others mostly come later. Liberal use of these gorgeous flowers, in their different types, and desired colors, will enhance the beauty of your home grounds thru the Spring bulb Season, and add several weeks to the length of this enchanting time.

C O N T E N T S (cont.)

CROCUS - page 23

- endearing harbingers of Spring, in white, yellow, blue, purple, and blue and white striped.

MUSCARI - page 23

- Grape Hyacinths, one of the most familiar of the smaller bulbs, hardy and long lasting. Splendid in Rock gardens.

SCILLAS - page 23

The Scillas, or squills, are excellent in Rock gardens, among shrubbery, under trees, etc., etc. The bulbs increase rapidly, are hardy, and will last for years. The 'Sibiricas' are early blooming, and quite small, - Spring Beauty is the larger, but still only around 6 inches. The 'Campanulatas', or wood hyacinths, are taller, up to 18 inches, and later blooming, usually with or after the late Tulips. Their slender spikes somewhat resemble Hyacinths, and they come in different shades of blue and pink, and white. They prefer partial shade, and so are right at home under shrubbery and trees, even Pines and Hemlocks, - but not too close to their roots.

* * *

ROYAL HORTICULTURAL SOCIETY CLASSIFICATION of DAFFODILS - page 2

- a listing of the different Divisions, and sub-Divisions, with their characteristics, found and recognized in the Daffodil family, as established and revised by the Royal Horticultural Society, of London. (The R.H.S. Classified List of Daffodil Names, giving the Classification of most varieties now generally grown, - close to 10,000 of them, - is offered on page 6 .

T E R M S , C O N D I T I O N S o f S A L E

MINIMUM ORDER - not less than \$3.50

EARLY ORDERING - please, place your order EARLY, not later than May 15, if at all possible. If necessary to send in your order much more than a month or so after that date, it would be well to list several second choices, in case some of the desired varieties cannot then be supplied, - or give me permission to substitute similar, as good or better varieties.

DISCOUNTS - a generous discount, in cash, or extra bulbs (varieties of your choice) is allowed on these early orders, received by May 15th., when accompanied by payment in full, including a sufficient amount for postage (if shipment is to be by P. Post). The size of the discount depends on the size of the order; these figures will be found on the order-sheet which is enclosed, -(unless you have gotten this catalogue thru a Garden Club which is getting up an order), - in which case the discount goes to the Club, to be used for some very worth-while project.

PRICES - those quoted are for highest quality bulbs, and in most cases top-size. 100 bulbs may be had for 7 times the dozen price, - with no further discount, as this 100 rate is in itself a 30% discount from the single bulb price (daffodils). A.D. S. members, - you will note that some of my prices as given, - those on the varieties also offered by the growers mentioned in the 1st. paragraph, page 3, are somewhat higher than theirs, but after the discount has been taken (up to 25% on a larger order), they will compare very favorably. The discount also applies on Tulips, Hyacinths etc. so please remember to take it into consideration when comparing prices on these bulbs.

PAYMENT - should be made in full with your order, - check or money-order, (excepting Garden Clubs), if you wish to take advantage of the Early order discount. Otherwise, 25% with your order, and the balance Sept. 1st., - or if you have established credit, - on receipt of the bulbs.

Please add a sufficient amount for postage, according to the following table, to the total of your order, - unless you wish it sent by Express. (P.Post usually costs less, except for larger shipments, going long distances). If too much is sent, - an appreciable amount, - extra bulbs will be sent for same.

QUANTITY*	ZONES 1 & 2 (to 150 mi.)	ZONES 3 & 4 (to 600 mi.)	ZONES 5 & 6 (to 1400 mi.)
$\frac{1}{2}$ dozen (or less)	.30	.35	.45
each addtl. half-doz.	.08	.12	.20

*(these figures are for Daffodils and Hyacinths; for Tulips and the other smaller bulbs allow one-third what the same number of Daffodils would take, - minimum .35 if order is for these smaller bulbs only.)

If beyond the 6th. zone, please inquire at your P.O. as to the correct amount, allowing 3 lb. to the dozen for Daffodils and Hyacinths, 1 lb. per dozen for Tulips, and $\frac{1}{2}$ lb. per doz. for the smaller bulbs.

DELIVERY - bulbs will be shipped at planting time, in Sept. or Oct., with Northern orders going out first, in as far as possible. As noted elsewhere, many bulbs from the Pacific North-west, England, Ireland and Holland, - besides my own, - are used in filling my orders, and those orders for which these bulbs are required cannot be sent out until I receive the bulbs. Sometimes this is not as early as I would like, and I am held up some in getting your orders out, but you will still receive them in good time.

GUARANTEE - I exercise every care and precaution in keeping stocks true to name, and buy bulbs only from other growers who do the same. However, mix-ups can occur during the rush of a busy digging or shipping season, and should this happen, and any variety prove untrue, same will be replaced; (but please remember that in a hot, dry blooming season the coloring, substance, and even the form of many varieties is affected, so that they are hardly recognizable as the variety ordered) This is especially applicable if the variety is of English or Irish origin, and you are going by the originator's description, or if you have seen specimens of these varieties flown in from Ireland, - where the season is usually cool and moist, ideal for Daffodils.

Likewise, to the best of my knowledge, only sound healthy bulbs are sent out; my fields and harvested bulbs, and those of the growers from whom I buy are regularly inspected by the proper authorities. Any bulbs failing to come up the first year, or being definitely unhealthy will be replaced, - unless there is conclusive evidence that the fault was not with the bulbs, but in some growing condition in the customer's garden.

AMERICAN DAFFODIL SOCIETY - the 1963 Convention of the A.D.S. is to be held in Stratford, Conn. (near Bridgeport), April 25th. thru the 27th. There will be an interesting program, featuring visits to a number of outstanding gardens, the Eighth Annual Connecticut Daffodil Show, in Greenwich, lectures, discussions etc. on topics of interest, - and much more. After dinner speakers will be Dr. William Brown, of Johnson City, Iowa, and Miss Elizabeth Lawrence, of Charlotte, N. C.

If you are not a member of the ADS, but would like to be, just send your name and (complete) address to Mrs. Grover F. Roennfeldt, 7426 Lynn Ave., University City, 30, Missouri, with \$3. as Annual dues.

GARDEN CLUB of VIRGINIA STATE DAFFODIL SHOW - this will be held at the Court House Country Club in Fairfax, on April 9th. and 10th. This is one of the top Daffodil Shows in the country, as well as one of the first, - this will be the 29th. Annual Show.

ROYAL HORTICULTURAL SOCIETY Classified List of Daffodil Names, - the latest (1961) edition, - \$1.25 postpaid. (Last year I inadvertently sent out several of an older edition, when the '61 edition was desired; if this happened in other instances, please let me know, and I will rectify the mistake.)

"THE DAFFODIL" - by Michael Jefferson-Brown; I have a few copies of this comprehensive and authoritative book on hand. The price is \$3.50.

C U L T U R A L N O T E S

Daffodils are among the easiest of flowers to grow. Given only a little care, and a few required conditions, they will reward the grower with an ever increasing wealth of beauty, year after year. They prefer a sandy loam, but will do well in in any good, WELL DRAINED garden soil. Planting should be done in time for the bulbs to make good root growth before winter, - early Sept. thru Oct., depending on your Latitude. I have planted bulbs in mid-December, here in Va., and had them do well, but this is not recommended. Large bulbs should be set from 5 to 7 in. deep, - to the base of the bulb, - or even deeper for Naturalized plantings. The distance between the bulbs may be anywhere from 6 inches, up.

If the soil is rich, no fertilizer is necessary; if just average, bone-meal and/or pulverized cow manure, compost and the like are good. These should be thoroly mixed thru the soil at or before planting time..It is best to prepare the beds where the bulbs are to be planted several weeks or more ahead of time, so that the soil will have a chance to settle. A light top-dressing of these fertilizers, supplemented by hard-wood ashes, ground rock phosphate, etc., applied during the late Fall or winter before the 2nd., - and subsequent blooming seasons, will be found beneficial. If you wish to use a chemical fertilizer, it should contain little or no nitrogen, but substantial quantities of phosphorus and potash. A mulch of peat moss, spoiled hay or other good mulching material, applied during the winter, will be helpful in many ways, not the least of which is preventing heavy rains from splashing and spoiling the flowers.

Daffodils should not be planted in lawns, or any place where the foliage will be cut off before it ripens, as this foliage is needed to mature the bulbs. One of the nice things about Daffodils is that they need not be dug and replanted every year, - every 3 or 4 years is sufficient, or when they have increased to the point that they are too thick to bloom well. Naturalized plantings, if planted deeply so that they increase slowly, may be left undisturbed for 10 or 15 years, or more, producing good crops of flowers each year. On the other hand, if blooms are desired for Exhibition purposes, better flowers will result if the bulbs are dug and replanted every second year.

CULTURAL NOTES (cont.)

Digging may be done when the leaves have turned mostly yellow, six weeks or so after the end of the blooming season; it is not necessary to wait until the tops have died down completely, in fact it is better not to do so, as it is then harder to find the bulbs, - and in a rainy season, some may already have started new root growth by this time, for the following season. The bulbs should not be left out in the sun, but placed immediately in a cool airy building, in flat boxes or mesh bags. The tops may be left on to dry up, or broken off, as you prefer. After curing a month or six weeks, the roots and outer skins will be dry enough to be removed; this may be done by hand, or by shaking gently in a mesh or burlap bag. Bulbs which pull apart easily should be separated, - otherwise not. Replanting, as described at the beginning of these notes, should then be done in September or October.

DAFFODILS

Limited space allows only the briefest of descriptions, which are very inadequate, and which make many varieties appear to be very similar. However, if you have seen these varieties at Shows, or in your friend's (or other's) gardens, you can see that most are quite distinct, with characteristics of their own. If you have attended some of these Shows, and/or visited gardens where they are featured, you likely have made lists of the varieties which you would like to have in your garden next Spring. If you have not been able to do this, there is still sufficient information given here to enable you to select the proper varieties for your needs.

The number, and letter preceding the variety name denotes the Division (or Class) to which that variety belongs, - whether it is a Yellow Trumpet, a Bi-color Large-cup, Triandrus, Poeticus, or what; (see the RHS Classification of Daffodils, on page 2, - inside front cover).

Varieties marked with an asterisk (*) are especially recommended for landscape use, and cutting. They are strong growing, and free-flowering, and priced so that they may be used in quantity. Varieties with (EX.) before the description are Exhibition varieties, those which if well grown, and given a little special care and protection, should win Blue Ribbons for you, at your Daffodil, or Spring Flower Shows. (Many other varieties, not so designated, are also often 'winners').

The (abbreviated) names in parentheses, following the variety name, are those of the originators. The letters following give the relative approximate blooming season: EE - extra early; E - early; EM - early mid-season; M - mid-season; LM - late mid-season; L - late; LL - very late.

Prices are per single bulb, - with 12 for the price of 10, and 6 or 3 at this same rate (6 for the price of 5, and 3 for 2½ times the each price.)

	EACH
9 *ACTAEA (Lubbe)(LM)(EX.) large outstanding Poeticus	.25
3b ACCOLADE (Rich.)(LM)(EX.) pure white and intense solid red	2.65

* * *

HOLLAND GROWN DAFFODILS - as it is impossible for me to grow all the bulb needed to fill my orders, many of these orders are partly filled with Dut grown bulbs. They produce wonderful flowers the first year; in subsequent seasons they produce a larger number of flowers, which sometimes are of less substance, and the stems not so sturdy. By taking these bulbs up after the 2nd. season, dividing and replanting (all this at the proper time, - see Cultural Notes, on page 6 and 7), they will again produce the same fine quality flowers, and will not need replanting again so soon.

BUSINESS FOR SALE (?) - I am not getting any younger, and feel more and more that the duties involved in keeping it going, situated as I am, - with insufficient help, and only rented land for growing the bulbs, - are most too much for me. Hence, I am thinking that I might like to sell out, - at least the mail-order part of the business, - if I could do so to advantage.

Possibly someone receiving this catalogue is "itching to get into the game", growing Daffodils commercially. If so, here is an opportunity to take over a going business, - with lots of 'good will'; there is a good mailing list, - a large no. of (more than) satisfied customers, many send in good sized orders nearly every year, - and a nice stock of bulbs, trays, etc.

If I should sell, I should prefer doing so to someone in another state, or at least another part of Va. (not the South-west), and I would then keep part of the bulbs (and trays), and go in exclusively for local trade. Would also like to grow a lot of other bulbs & plants, which I have been unable to do for the past 15 years. Let me hear from you, if interested, and maybe something mutually beneficial will result.

G.D.W.

2b	ZIRCON (O.B.F.) (M)	white and golden yellow	.65

MIXTURE - made up of many excellent varieties, splendid
for cutting, borders, etc. : per 100 - 3.50
300 or more, " 100 - 7.50

ASSORTMENTS - named varieties, put up separately and labeled;
25, 50, 100 or more of a variety (but not less
than 100 bulbs altogether). These are often more effective
than a Mixture, especially for Naturalizing, in woodland or
meadow, etc. Please state your preference as to color, and
type (I don't have too many whites, - other than Thalia),
and I will come as near that as possible in the selection of
varieties. If there are certain varieties which you would
like, I might have them, or if not, then something similar.
I expect to use a number of varieties listed in this cata-
logue, of which I have large stocks (including Agra, Dick
Wellband, Golden Goblet, Red Guard, Selma Lagerlof, Thalia,
Trevithian, Twink, and some others in the same price range,) as
well as many other fine varieties for Naturalizing, which
are not listed.

Assortment, named varieties, per 100 -9.00
300 or more " 100 -8.00

The above Mixture, and the Assortments, will be
mostly large Double-nosed bulbs; if some are smaller they
will still be a good blooming size, and enough extra to
make up for the difference in size.

L I L I E S : I can supply the famous Jan de Graaff Hybrid Lilies; these
lovely flowers, in dozens of different forms, and many colors, are just
as thrilling and exciting in your summer garden, - from early June until
October, - as are the Daffodils, in the Spring. If interested, please
write for color folder, - showing thirty-five varieties in gorgeous color, -
and prices.

D A F F O D I L S H O W S

Several more, in addition to those mentioned on page 6, which some
of you might like to visit, - and possibly enter blooms in competition -

 QUEEN OF THE PINKS - large compact spikes, of lovely bright pink
 YELLOW HAMMER - a good yellow; early

* * *

BULBS FOR FORCING : many of the bulbs offered in this List may also be grown indoors in pots, or bulb pans. The Hyacinths, earlier Tulips, and many Daffodils, - especially the Yellow Trumpets, and large-cupped varieties, - are splendid for this purpose. If potted up in good time, they may be had in bloom by mid-January, or shortly after, to brighten and cheer your home, and to bring a touch of Spring-time, long before it arrives outdoors. Pots may be secured from your local florist, along with information on the procedure to follow. Informative articles on this phase of bulb growing will also be found in many garden magazines and publications. (Please indicate on your order which bulbs, if any, you plan to use for forcing, so that I may send bulbs best suited for this purpose.)

T U L I P S

Top-size, best quality bulbs, from several of Holland's leading growers. Tulips, as well as Daffodils, do best when the weather is cool and moist, so if your weather at blooming time (or before) is hot and dry, your planting should be watered copiously. Another note, - mice, chipmunks etc. are very fond of Tulips, Dutch Iris and some other bulbs (not Daffodils), so if these pests are prevalent, measures should be taken when planting, to protect the bulbs.

TULIP FOSTERIANA - large long-petalled, early flowers.	per Dozen
ALBAS - ivory white, softly shaded pink; yellow base	2.50
ALPINE GLOW - carmine-rose, edged yellow; inside amber-yellow, on red-blotched black base	1.80
